

EXAMSOFT CERTIFICATION STUDY GUIDE

RUBRICS

In this study guide, you will find the exam blueprint and sample questions for all certification exams, as well as activities to help you prepare for becoming ExamSoft certified! The exam blueprint provides all of the learning objectives you will be measured on within each exam, along with corresponding resources to help you review and practice within those areas. You will also see the weight of each learning objective in relation to the overall exam. Next, you'll get a glimpse of the exam by viewing sample questions. Last, you'll come across the activities section, which has tailored action items to give you hands-on practice related to your learning objective.

Be sure to take full advantage of the resources laid out in this guide. If additional information is required, be sure to use our additional resources:

Total # of Questions: 28

Question Types: M/C, T/F, FITB, Essay

Time Limit: 75 minutes

Sample Questions

Questions

1. When revising a previously approved question, which part of the question's identifier will update to show that a change has been made?
2. You have created a multiple choice question that contains an answer choice marked as 'all of the above'. If the answer choices will be randomized, how do you indicate that this response should always be the last answer choice?
3. True or False: Copying and pasting questions from an outside source into the portal will not remove HTML formatting.

Assessments

1. A User would _____ an assessment to create a new identical copy of that assessment in draft mode.
2. A question must be in what status before it can be added to an assessment?
3. True or False: The Download End Date for an exam posting can be extended past the Remote Assessment Deletion date.

Reports & Scoring

1. Which report is used to see the total time an exam taker has spent in a particular assessment?
2. What is the purpose of the KR-20?
3. True or False: An Exam Taker's score can never be higher than 100%

SofTest

1. What is the keyboard command for reverse downloading an exam on a Windows machine?
2. True or False: Log time stamps are based on the computer's local time
3. SofTest saves automatically every ____ seconds.

Rubrics

1. True or False: Users can attach both rubrics and rubric templates on performance assessments.
2. What are the two different rubric types that can be created?
3. In order to remove previous grades, set for a performance assessment, a user would have to click the _____ button.

Answer Key

Questions

1. Revision ID
2. Lock the Answer Choice
3. True

Assessments

1. Duplicate
2. Approved
3. False

Rubrics

1. False
2. Points based and Scale based
3. Clear Grading

Reports & Scoring

1. Elapsed Time Report
2. To measure the internal consistency of an assessment
3. False

SofTest

1. Ctrl + F3
2. True
3. 60

Activities

Questions

1. Add the ETs column to the Questions Listing Page.
2. Attempt to import one of each question type using both RTF and Tab Delimited files (Ex: At least eight questions).
3. Create one of each available question types and add them to an assessment. Once all questions have been added, save the assessment and then click the [Preview Exam button](#). Attempt to take the exam and verify how each question appears on SofTest.

Assessments

1. Create an exam and incorporate features such as: Disabling Backward Navigation, Randomizing Questions, and Disabling Security. Afterward, attempt to take the exam using a student account
2. Create a folder and then create two questions to place into that folder. Be sure to approve one question and save the other only during the creation process. Attempt to add both questions to an assessment. Are you able to add both?
3. Add the Password column to the Assessment Listing Page.
4. Attempt to post an exam and enable both Remote Assessment Deletion and Ping & Release.

Reporting & Scoring

1. Navigate to a recently posted and scored exam. Click the Adjust Scoring tab and set a question as a bonus question. Now attempt to run reports for that exam to see any changes that were made based on an adjusted question.
2. Attempt to release results for an exam that has already been taken—try various combinations such as only showing the student name and score or more in-depth reports such as giving a full readout of the categories and how they performed for each.

SofTest

1. Create a student account and attempt to log in using that account. Download SofTest from the portal and install the program on your computer.
2. Release results to the test student account for an exam. Log in using the student's information, navigate to the exam, and retrieve results in the same manner a student would.

Rubrics

1. Post a rubrics-based performance assessment and then click the pencil icon to edit the post. Attempt to change the dates and option for the post. Once done, grade the assessment for one or more students. Now attempt to edit the same post using the pencil icon.
